Re: Recommendation for screening of File [09/13-01] – Imperial Oil's Beaufort Sea Exploration Joint Venture Drilling Program

Dear EISC Members,

The Inuvialuit Game Council (IGC) appreciates the opportunity to comment on the current project application referenced above.

Given the nature of this proposed development and the lack of detailed information in the Project Description on issues of importance (e.g. oil spill response) to the IGC, the Council is of the opinion that there is potential for significant negative environmental impact, and as such, pursuant to Section 11(17)(c) of the Inuvialuit Final Agreement the project should be referred to the Environmental Impact Review Board for assessment and review.

Thank you for your consideration of our comments.

Sincerely,

Frank Pokiak
Chair
