

Appendix A

Data Availability from GNWT Socio Economic Departments Human Environment Baseline Information Requirements

Terms of Reference	Information Available through GNWT
Demographics	
Provide a description of the social and demographic profile(s) and trends in the area of the Project, including the following:	
· population and population trends by community and by region	Annual population estimates and projections
· number of persons per household and number of households	Available every 2 to 3 years, latest data from 2009
· age and gender	Annual population estimates and projections
· ethnicity	Annual population estimates and projections
· births, teen births and deaths	Annual
· in/out migration by community and region, and factors that could contribute to migration patterns	Partially available
Regional and Local Economies	
Provide a description of the local and regional economies and their performance, including:	
· national, provincial, and territorial gross domestic product (GDP)	Annual
· employment rate (including part-time, full-time, seasonal, and self-employment)	Monthly and annually for NWT, for community/regional available every 2 to 3 years, latest data from 2009
· employment by industry and occupation, including occupations related to traditional activities	Monthly and annually for NWT, for community/regional available every 2 to 3 years, latest data from 2009
· employment by age, gender, and ethnicity	Monthly and annually for NWT, for community/regional available every 2 to 3 years,

	latest data from 2009
· job vacancy and unfilled positions	Not available
· labour force growth	Monthly and annually for NWT, for community/regional available every 2 to 3 years, latest data from 2009
· labour force participation and labour force balance between wage and non-wage sector activities	Monthly and annually for NWT, for community/regional available every 2 to 3 years, latest data from 2009 N/A for non-wage sector
· income and income balance from all sources on a household and per capita basis	Annual
· earnings growth	Annual
· annual level of social assistance benefits on a household and per capita basis	Annual
· annual level of social assistance recipients	Annual
· poverty levels	Information for income below certain threshold levels
· local consumer prices and cost of living, particularly with respect to food, fuel, utilities, transportation, housing, affordable housing	Community Price Index – <u>food</u> prices only
· level of local households consuming harvested meat and fish	Available every 2 to 3 years, latest data from 2009
· current status of the renewable resource sector and related harvest activities, and the factors that affect them	Not available
· current and projected land-based enterprises and economic activities, including those related to tourism, outfitting, commercial harvesting, recreation, renewable and non-renewable resources	Available
· number of licensed businesses	NWT only
· number of licenses businesses by Inuvialuit ownership and gender	Available
· local and regional economic development goals and objectives as identified in public consultations, the Inuvialuit Final Agreement (IFA), Community Conservation Plans (CCPs)	Not available
Education, Training and Skills	
Provide a description of the education, skills and training levels in the communities relevant to the Project, including:	
· graduation and achievement rates including high school or higher	Available for NWT for high school, may be available regionally

	Highest Level of Schooling available every 2 to 3 years, latest data from 2009
· trade certification levels	Highest Level of Schooling available every 2 to 3 years, latest data from 2009
· education, training and skill levels as these relate to existing employment patterns and opportunities	Available
· adult basic education and literacy programs Identify education, training and/or certification programs and institutions available within the region to residents of the Project area.	Available
Describe the timing and duration of education and skills development programs that would be required for Project-related employment.	Available
Infrastructure and Institutional Capacity	
Describe local and regional infrastructure and institutions	
Human Health and Community Wellness	
Provide a description of the status of human health and community wellness in the area of the Project, including:	
· the physical, mental and social health of residents of the areas affected by the Project, based on local perceptions of health and well-being and quantitative indicators, where available, that include:	Not available
o mortality and morbidity	Annual
o relevant diseases, both non-communicable (i.e. diabetes) and infectious diseases	Information not available at community level
o children's health, including infant mortality and dental health	Infant mortality is too low to report. Dental health info not available
o nutrition (e.g., the availability and significance of traditional and country foods as well as store-bought food sources)	Not available
o indicators of personal health practices such as smoking rates and levels of physical activity	Information not available at community level
o social pathology or dysfunction (e.g., family violence; suicide, family violence, crime rates)	Annual for most
o alcohol, drug and other substance abuse	N/A at community level
o sexual health, including sexually transmitted infections and teen pregnancies	Annual
o Homelessness and poverty	Not available
· support systems and programs available regionally and locally	Not available

to address human health and community wellness (e.g., health services, elder care, child care, counseling, alcohol and drug treatment, healing centres)	
· age, gender and ethnicity	Not available
This description of health status should include indicators of determinants of health, including physical, social, cultural and economic aspects.	
Socio-cultural Patterns	
Describe socio-cultural patterns and social organization in the communities in the Project area to assist in understanding social stability and cohesion, including:	
· cultural and spiritual life of the communities, including language	N/A; ability to speak aboriginal language available every 2 to 3 years, latest data from 2009
· patterns of family and community life, such as community and household social organization, including the organization of work, both paid and unpaid, and its distribution between men and women, and the patterns of sharing and mutual aid	Not available
· participation in traditional activities, by age and gender	% of persons who hunt or fish and frequency available every 2 to 3 years, latest data from 2009; some data on arts and crafts production as well
· social relations between residents and non-residents, between men and women, among generations and between aboriginal and non-aboriginal persons	Not available
· support systems and programs available regionally and locally to address social and cultural development issues	Not available
Harvesting	
Provide a description of current and traditional harvesting, focusing on subsistence and commercial harvesting, including:	Not available
· harvesting activities and other traditional uses by Inuvialuit within areas affected by the Project, including:	Not available
o the contribution from subsistence, sport, and commercial harvesting to the household and community economy	Not available
o current resource accessibility and quality for harvesters	Not available
o level of harvests	Not available
o level of participation in harvesting activities for household food supply	% of food consumed by household that comes from

	hunting or fishing available every 2 to 3 years, latest data from 2009;
o location of harvest areas, with specific attention to (1) areas where exclusive or preferential harvesting rights are granted by the IFA, (2) high use areas, (3) areas of sensitivity, and seasonal access	Not available
o recent and current encroachments and restrictions of harvesting activities (i.e. by competing uses of land and resources or related regulations)	Not available
· outfitting and trapping activities and related use areas (active and fallow)	Not available
Land Use	
Describe traditional and current land use patterns, designations and special management areas in the Project area	
Heritage Resources	
Describe existing archaeological, palaeontological, and historic resources, collectively referred to here as heritage resources, within the Project Area
