

ENVIRONMENTAL IMPACT REVIEW BOARD

March 8, 2012

Mark Warren
Assistant Deputy Minister
Executive Operations
Government of the Northwest Territories
P.O. Box 1320
Yellowknife, NWT X1A 2L9
Building L-6

Dear Mr. Warren,

Re: Information Requests related to the Proposed Inuvik to Tuktoyaktuk Highway Project

Please find attached Information Requests (IRs) that have been directed to the Bureau of Statistics from the Environmental Impact Review Board seeking information related to the proposed Inuvik to Tuktoyaktuk Highway project. These IRs have been generated as part of the environmental impact review of the proposed development being undertaken by the Environmental Impact Review Board (EIRB) to fulfill the requirements of the Inuvialuit Final Agreement and the *Canadian Environmental Assessment Act*.

Please complete a separate response to each IR, and clearly reference the IR number, topic and the Party that generated the IR (i.e., the source). Please complete your responses and submit them to the EIRB by March 30, 2012.

Please contact me if you have any questions or concerns regarding this letter.

Sincerely,

Eli Nasogaluak
EIR Coordinator
Environmental Impact Review Board

INFORMATION REQUESTS

(Round 2)

DATE OF RELEASE: March 8, 2012

DISTRIBUTION: Bureau of Statistics, GNWT and the Electronic On-line Registry (EOR).

PURPOSE: Information Requests (IRs) issued by the EIRB to the Bureau of Statistics, GNWT related to the Review of the proposed Inuvik to Tuktoyaktuk Highway Project.

**DEADLINE FOR SUBMISSION
OF RESPONSES:** March 30, 2012

Information Request (IR) Numbers: 81, 83

IR Number: *Number is assigned by EIRB*

Source: EIRB

81

To: Canadian Northern Economic Development Agency (CanNor)
GNWT Bureau of Statistics
GNWT Industry, Tourism, and Investment
GNWT Public Works and Services
Inuvialuit Regional Corporation
Inuvialuit Development Corporation

Subject: Tourism (Developer Response to 2b and 2c, Section 9.0, pp. 83-86)

Preamble

The Developer estimates that “the total number of tourists to visit the Inuvik-Beaufort-Delta region would increase by about 10% to 5,500 tourists per year with the completion of the Highway. These additional visitors are anticipated to spend an additional \$1,467,500 in the region.” (Developer Response to 2b and 2c, p. 84).

In Table 4 of the Developer Response to 2b and 2c (p. 85), the Developer provides information on monitoring change in tourism, commercial and recreational business and revenues, and lists the following measurement parameters:

- Number of tourists
- Amount spent by tourists
- Number and types of businesses operating in Inuvik and Tuktoyaktuk
- Household consumption expenditure for commercial and recreational use
- Land used for recreation
- Highway traffic trends
- Number of complaints from local co-management agencies

The Developer identifies several agencies and organizations with existing responsibilities “related to administering related legislation, providing funds or public services, and/or conducting monitoring” (p. 85), but does not provide details regarding how project-related effects will be monitored and by whom.

Request

1. Please describe the specific activities that your agency or organization will undertake with regard to monitoring project-related tourism (and any effects of this tourism), including the frequency of monitoring. Please indicate which of the measurement parameters listed above your agency or organization will monitor. Please describe any additional indicators or measurement parameters that your agency or organization will monitor. Please explain how the results of monitoring will be reported (both by your agency/organization and to your agency/organization) such that mitigation can be adapted, if necessary.
2. Please describe whether, and how your agency or organization will be involved in mitigating adverse effects of project-related tourism, as well as enhancing positive effects of tourism.

Subject: **Demographic Trends and Housing** (IR Responses Round 1, IR #28; Developer Response to 2b and 2c, Section 8.0, p. 81; Developer Response to 2b and 2c, Section 12.0, p. 112)

Preamble

In the Developer Response to 2b and 2c (Section 8.0, p. 81), the Developer states that while the project is not expected to affect Inuvik's projected growth rate, "...the completed Highway will increase accessibility to the Hamlet of Tuktoyaktuk. Although the population of Tuktoyaktuk has been slowly decreasing since 1996, it is possible that once the Highway is established, Tuktoyaktuk could maintain or increase its population."

In the response to Round 1 IR #28, the Developer provided information on current monthly housing costs, as well as the amount of occupied and unoccupied dwellings², and stated that "The creation of new demand for housing from a Project is a function of demographic changes and increased affluence from employment income." The Developer further stated that the project is unlikely to create new demand for housing, as it is anticipated that the majority of workers will be from Inuvik or Tuktoyaktuk, and that the relatively short economic increase during construction is not expected to increase demand of existing community residents for new housing.

However, as noted in the Developer Response to 2b and 2c (Section 8.0, p. 81), year-round access to Tuktoyaktuk could attract residents, or otherwise affect mobility between communities in the ISR, which, in turn, could affect the demand for housing and housing costs.

The Developer has noted that demographics are monitored at the territorial level by the GNWT Bureau of Statistics and the regional level by the Inuvialuit Regional Corporation. The Developer has also identified the NWT Housing Corporation and GNWT Public Works and Services as "agencies that have responsibilities related to administering and monitoring housing" (p.112) but does not provide details regarding how project-related effects will be monitored and by whom.

Request

1. Please describe the role of your agency, department, or organization in monitoring in-migration and out-migration for the communities of Inuvik and Tuktoyaktuk, as well as mobility between

² The Developer did not provide information regarding the current conditions of housing (i.e. those in need of minor or major repairs). It is noted that this was not requested of the Developer, but that it should be taken into consideration.

- the communities of the ISR. Please include the frequency of monitoring and reporting, and indicate which other departments, agencies, and organizations the information will be made available to.
2. Please describe the role of your agency, department, or organization in monitoring housing, including demand for housing, housing costs, availability, and conditions, in both the communities of Inuvik and Tuktoyaktuk. Please include the frequency of monitoring and reporting, and indicate which other departments, agencies, and organizations the information will be made available to.
 3. Please describe the expected length of time that would be required to respond to increased housing demand, including upgrading available housing as well as building new housing.
