Environmental Impact Review Board
P.O. Box 212
Inuvik, NT X0E 0T0

[VIA EMAIL]

Attention: Mr. Eli Nasogaluak, Environmental Impact Review Coordinator

Subject: Large File Transfer Site – Available to November 6, 2012
Environmental Impact Review, Inuvik to Tuktoyaktuk Highway [02/10/05]

Dear Mr. Nasogaluak,

The following documents were submitted to the Environmental Impact Review Board during their consideration of the Inuvik to Tuktoyaktuk Highway Project:

- Final Report of Geotechnical Investigations of Proposed Borrow Sources for Inuvik to Tuktoyaktuk Highway (Registry #232)
- Granular materials reference (Registry # 272)
- Plan/Profile Sheets (Conceptual Design) for Preferred Alignment (Registry #315)
- High Level Routing Map – Preferred Alignment, Inuvik to Tuktoyaktuk Highway (Registry #316)
- Final Report of Hydrotechnical Report for Inuvik to Tuktoyaktuk Highway (Registry #319)

Due to the size of the files, copies of each of the documents were made available to the EIRB on FTP sites. The intention was that these FTP sites would be available for a short period to facilitate download of the documents and the FTP sites have now closed.

The documents have been uploaded to a new site that will be available until the registry closes on November 6, 2012. Access links to the site are provided below. Please download these files and archive/repost the files to the registry as appropriate.

Automatic FTP site link: <ftp://INUVIKHGHWWY0954:9006940@proiftp.stantec.com>

Paste the link into Windows Explorer (not Internet Explorer)

Manual FTP site link: <ftp://proiftp.stantec.com>

Login name: INUVIKHGHWWY0954

Password: 9006940

Sincerely,

Jim Stevens
Director, Inuvik to Tuktoyaktuk Highway
